

SEPURA™

the specialists in

condensate filtration

SEPURA
SEP 900 ST

superior technologies

SILEXA

It's what separates the best from the rest

Developed by filtration specialists Bowman Stor, SEPURA provides an innovative, cost-effective, and environmentally beneficial solution for the treatment of air compressor condensate. Covering compressed air systems from 60 – 7,000 cfm, the SEPURA oil-water separator range contains our revolutionary SILEXA™ filtration media.

Made from recycled glass bottles this fully sustainable and renewable patented media is 20% more adsorbent than traditional virgin products, as well as providing a host of major advantages:

- Cleaner, lightweight handling
- No pre-soaking required
- Rapid installation
- Fast, easy servicing
- Outlet quality discharge down to 5ppm.

Innovative design from the home of filtration technology

The SEPURA range is the result of many years of filtration industry knowledge, research and development. From our advanced Bowman laboratories we are continuing to create groundbreaking solutions in our quest to constantly improve the design and performance of oil/water separation products.

We've got a separator for your application

SEPURA offers a comprehensive range of condensate filtration solutions comprising low, mid and high capacity separators. From the compact, revolutionary single use SEP 60 ST to our heavy duty SEP 7000 ST we have a separator to suit most industrial applications.

- Low capacity - up to 60cfm (1.7m³/min)
- Medium capacity – 120cfm to 2500cfm (3.4 – 70.8 m³/min)
- High capacity – 3500cfm to 7000cfm (100 -200 m³/min)

Good for the environment – good for you

We pride ourselves on being market leaders in our area of expertise - providing the most innovative, available, sustainable and renewable solutions to our customers. Using SEPURA filtration products gives you the reassurance that when you discharge treated condensate you are fully complying with current legislation and fulfilling your environmental responsibilities – clear condensate, clear conscience.

SEPURA™

superior technologies

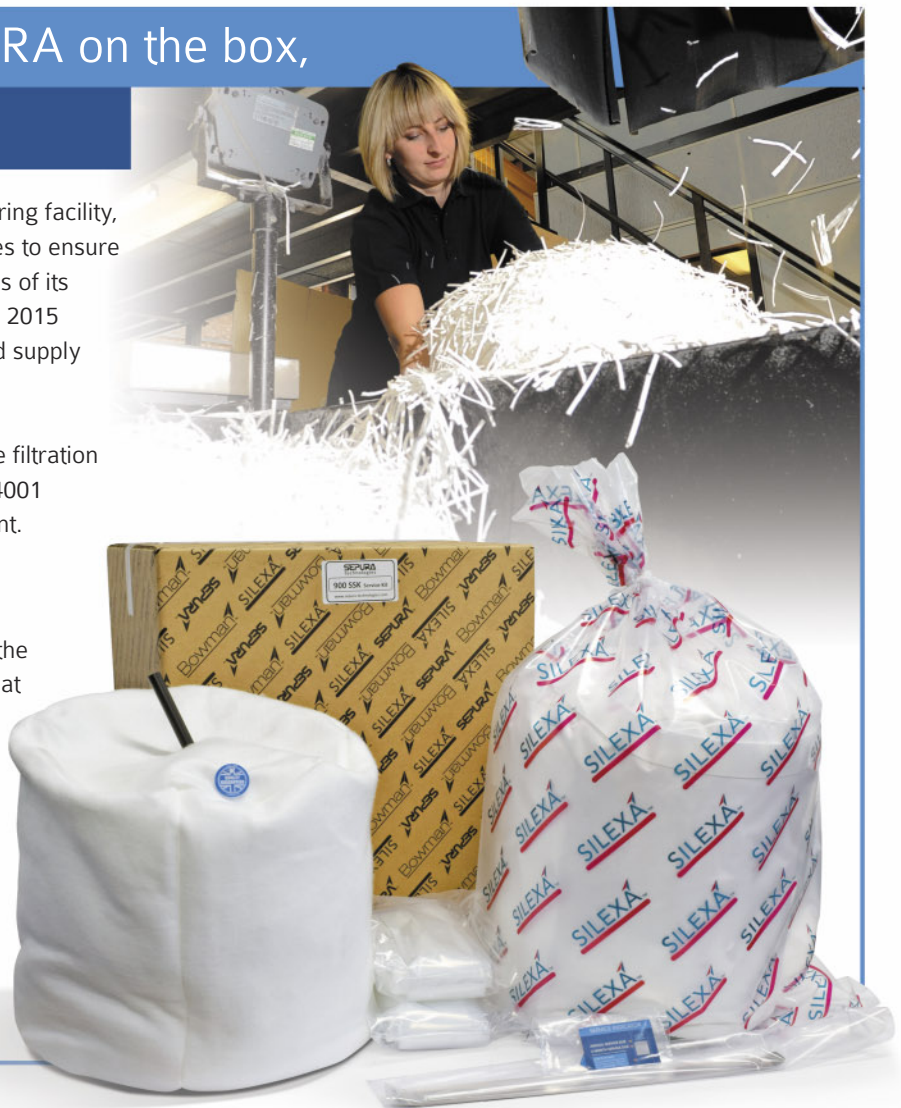

If it doesn't say SEPURA on the box, it's not SEPURA!

Operating from its extensive UK manufacturing facility, Bowman has developed rigorous procedures to ensure that all SEPURA products meet the demands of its global customers and has gained ISO9001 - 2015 certification for the design, manufacture and supply of filters & filtration equipment.

To support our growing range of sustainable filtration solutions we are now on-track to add ISO14001 accreditation for environmental management.

All our service kits are clearly identified by the BOWMAN/SEPURA/SILEXA branding so that our customers can be confident that they have genuine SEPURA products.

Only Bowman's revolutionary SILEXA™ patented oil selective, hydrophobic, oleophilic media, offers such a superior level of performance.

Leading the world in Condensate solutions

With a growing international network of distributors SEPURA is a global force in the supply of high-performance oil/water separation products. Contact your local representative for further information.
